

K-Love radio provides me with a family friendly choice of radio where I don't have to hear bad language or other comments. This is a commercial-free station providing encouragement without having to sit through ads that may be inappropriate. Without this station the community would lose this choice and families would have to do without this. There are enough secular channels as it is; more are not needed. I believe this service to be in the public interest as most of the PUBLIC would rather not hear some of the filth allowed, however the corporations selling their products are not interested in the public good. Although there may be a few other local stations available that provide similar programming, the national availability of K-Love allows families to stay connected by listening together.

Thank you for your consideration.
